Please find below and/or attached an Office communication concerning this application or proceeding.

Notification of Non-Compliant Appeal Brief

1. The brief does not contain a concise explanation of the subject matter defined in each of the independent claims involved in the appeal, referring to the specification by page and line number, and to the drawing, if any, by reference characters; and/or does not identify the structure, material, or acts described in the specification as corresponding to each claimed function for every means plus function and step plus function for each independent claim involved in the appeal and for each dependent claim argued separately by reference to the specification by page and line number, and to the drawing, if any, by reference characters, as required by 37 CFR 41.37(c)(1)(v). For example, in claim 16, Applicant claims "an electrically powered actuator having a portion ...". No mention of "a portion" relating to the actuator is described in the explanation. In claim 20, "a stationary driveline component" is not mapped. It is suggested that Applicant review all of the claims to ensure all limitations are properly mapped.
2. The brief does not contain a concise statement of each ground of rejection presented for review as required by 37 CFR 41.37(c)(1)(vi). Each heading should contain claims on appeal, citations of authorities, statutes and parts of the record relied upon.
3. No new time period is set. Extensions of time may be granted under 37 CFR 1.136.

Art Unit: 3683
